Head of IT & Business Systems (CIS Region)

Regional responsibility for IT and Business Systems across Kazakhstan, Uzbekistan and Russia.

Full ownership of:

- IT Infrastructure & Operations
- Microsoft 365 & Cloud Services
- ERP Landscape (1C, AX 2009\2012, D365)
- CRM Governance & Sales Process Enablement
- Customer Request Governance & Lead Qualification
- Business Applications & Reporting
- Cyber Security & Compliance
- Vendor & Contractor Management
- IT Governance & Service Management
- Digital Transformation & ERP Programs
- Facility Technology & Site Operations (CCTV, Access Control, UPS, Power Backup, Server Rooms and Production Site Technology)

Owned regional IT and business systems landscape supporting sales, manufacturing and ERP operations across Kazakhstan, Uzbekistan and Russia, ensuring alignment between business requirements, technology platforms and regional operations.

Key Business & ERP Achievements

- Leading end-to-end regional rollout of Microsoft Dynamics 365 (ERP transformation) across Kazakhstan and Uzbekistan, coordinating business, data, and system architecture with HQ and external vendors.

- Delivered +25% sales growth across CIS by redesigning sales processes and implementing end-to-end analytics and quotation follow-up system.

- Built and developed local ERP ecosystem (1C), including preparation for integration with D365.

- Implemented regional business intelligence and performance tracking solution (Power BI, sales funnel, margin, KPI and quotation follow-up reporting), significantly improving business transparency, pipeline visibility and decision-making.

- Led Customer Request Governance and Lead Qualification initiative, identifying process gaps between customer requests, quotations and business outcomes while improving CRM transparency and commercial opportunity tracking across CIS operations.

- Member of Steering Committee for Microsoft Dynamics 365 implementation.

Key Infrastructure & Operations Achievements

- Standardized IT infrastructure across CIS region (Kazakhstan, Russia, Uzbekistan), improving reliability and reducing operational risks.

- Successfully launched greenfield factory IT infrastructure from scratch in Atyrau.

- Successfully migrated CIS collaboration landscape to Microsoft 365 and delivered Teams-based communication services, including enterprise PBX integration.

- Designed and implemented resilient local infrastructure, including UPS modernization, diesel power backup and business continuity measures, ensuring up to four days of operational autonomy for critical business systems.

- Led localization of IT infrastructure and ERP systems in high-risk environments (Russia), ensuring business continuity.

- Driving workplace transformation (INTUNE migration) to improve system stability and user productivity.

- Unified regional CCTV and Access Control landscape by standardizing security platforms, governance and support model across CIS locations, reducing complexity and improving operational visibility.

IT Governance & Service Management

- Reduced IT operational costs by 15% through vendor consolidation and process optimization.

- Implemented ITSM practices, reducing incident resolution time by 30% and increasing user satisfaction to 4.8/5.

- Established regional cyber-security awareness program and phishing simulation campaigns, significantly improving security culture across CIS.

WIKA
www.wika.ru/

System Administrator

Managed the full IT landscape of a manufacturing site in Russia and five international offices (Kazakhstan, Belarus, Uzbekistan and Azerbaijan), supporting more than 200 users, 30+ physical and virtual servers, industrial equipment and ERP systems in a geographically distributed environment with limited resources.

Technology Stack

Infrastructure:

- MS Server Roles (AD, DNS, Exchange Hybrid, WSUS), Zimbra, VMware 6, Hyper-V, VDI

Networks & Security:

- Cisco, HP Enterprise, PFSense, UserGate, WatchGuard, AudioCodes, CCTV & Access Control Systems (Hikvision, Perco, ZTeco, Kantech)

Business Applications:

- Microsoft Dynamics AX (2009, 2012, D365), 1C (Trade Management, Payroll, Accounting), MS SQL, SBIS, Diadoc

Cloud & MDM:

- Microsoft 365 Tenant Administration, Intune, Citrix, Azure AD

Key Achievements

- Delivered localization of IT infrastructure, industrial systems and ERP landscape for Russian operations following the 2022 market disruption, ensuring business continuity and transition to local ERP platforms.

- Led telecommunications vendor transition project, including contract management, procurement coordination and technical documentation.

- Managed implementation and adaptation of corporate IT policies, user training programs and localization of Group IT operating models across the region. Daily communication in English with HQ and international stakeholders.

- Designed and deployed local infrastructure, ERP and security operating models tailored to post-2022 business requirements.

- Managed call center services and analytics, redesigned IVR scenarios and successfully migrated telephony services to a dedicated PBX platform.

- Implemented workflow automation in SBIS, including internal procurement, sales approval workflows, invoice approval and payment approval processes.

- Automated electronic document management through Diadoc and integrated related solutions including accounting, banking and digital signature services.

- Participated in internal and external audit activities, ensuring compliance and documentation readiness.

- Supported industrial production systems, manufacturing equipment and related automation initiatives.

- Managed contracts and support services for Consultant Plus, TechExpert and other business-critical software platforms.

- Prepared and supported executive-level video conferencing, large-scale meetings and corporate events.

- Led procurement and lifecycle management of IT equipment, budgeting activities and strategic sourcing initiatives.

- Provided executive IT support for senior management and end users across multiple business units (Dell, Lenovo, Apple and Samsung platforms).
